

Chester County GHGRTF Information Committee Minutes

March 10, 2008

Attending: Mike Bullard, Vic Laubach, Heath Eddy, Sarah Caspar, Victoria Webb, Joel M. Kauffman, Gene Wilson

The meeting was called to order at 5:50 PM at the CC GSB.

The meeting began with introductions of the Committee members.

Mike passed out information from Steve's ppt showing the overview for the GHGRTF timetable, and then moved the Committee into a discussion of what the word information means in the context of the GHGRTF.

After much discussion, there was agreement that two goals for the Committee would be:

- 1) Create a clearinghouse for information for the GHGRTF. A web based solution is being evaluated. Gene added that the Committee should fact check the information. Joel offered to assist with this.
- 2) Benchmark the GHG reduction plans already created by other counties, cities, and municipalities.

Action items: Each Committee member agreed to review a county GHGR plan for the next meeting.

Referring once again to the GHGRTF timetable, the Committee looked ahead at what recommendations it would make to the Commissioners in December.

One idea was for the creation of a permanent Chester County GHG and Climate Change information resource, specific to the County, that would be available to residents.

Another idea would be to identify a demonstration project which the County could use to showcase the various work products of the other committees. As an illustration, the recently completed Radnor Middle School in Wayne was discussed.

Meeting was adjourned at 8 PM. Next meeting March 24, 2008 room 237
